

SINT MAARTEN CONDITIONS OF IMPORT

Dogs, Cats, and Ferrets

1. The animal must be at least fifteen (15) weeks old.
2. The animal must be marked with a microchip OR a readable tattoo applied before 2011.
3. The animal must be fully immunized against the Rabies virus through vaccination administered by or under the supervision of a licensed veterinarian. The immunization period must be valid for one (1) OR three (3) years at the time of entry into Sint Maarten.
 - a. An animal that has received a Rabies vaccination for the first-time or is revaccinated after the expiration date of the previous vaccination **MUST** undergo a twenty-one (21) day waiting period to guarantee full immunization.
 - b. Animals that are revaccinated prior to the due date of the next vaccination are exempted from the twenty-one (21) day waiting period.
 - c. The Rabies immunization information must be mentioned on the health certificate OR on a separate Rabies certificate.
4. The animal has full immunization against the following viruses according to its species through vaccination administered by or under the supervision of a licensed veterinarian:
 - a. **Canine (Dogs):** Distemper, Hepatitis, Leptospirosis, Parvovirus, Parainfluenza (DHLPP Vaccine), Bordetella,
 - b. **Feline (Cats):** Leukemia, Rhinotracheitis, Calicivirus, Panleukopenia, Pneumonitis
5. The animal has been administered parasitic treatment(s) by or under the supervision of a licensed veterinarian (e.g., *NexGuard, Bravecto, Frontline, etc.*) to treat and further prevent internal and external parasites (particularly the *Amblyomma sp.* And *Boophilus sp.*). The treatment(s) must be valid at the time of entry into Sint Maarten.
 - a. The product information, treatment date, and validity period of the treatment must be mentioned on the health certificate.
6. The animal is free from clinical signs of communicable, contagious, or infectious cutaneous diseases.

Applicable until December 31st, 2023
